FOOTSWITCH ACCESSORY INSTRUCTIONS

PART # EV/F

This Footswitch (FS) is designed for use with 110 volt evacuators only. It is a series style FS. It is plugged into a grounded outlet and the evacuator is plugged into the FS.

This FS is known as a 'Maintained FS'. It is also a Rocker style. This means that the FS is depressed one time at the top ('ON') to turn on the unit, and it stays on until the FS is depressed one time at the bottom ('OFF').

Thank you for purchasing one of our products. For further information, please contact us.
